

PROJECT MANAGEMENT

www.kepner-tregoe.com

Some project management training focuses on filling out templates and following checklists. At KT, we focus on producing results. The KT Project Management workshop equips project leaders with a robust, proven project management methodology combined with the KT Clear Thinking skills needed to deliver real, measurable project results. As the signature workshop in our Project Management Training Suite, this workshop prepares project managers to take on any size project and confidently see it through to success.

Key Benefits

Learn KT's proven Project Management methodology for use on any type of project.

Develop robust project management skills that are essential to achieve project goals on time and on budget.

Go beyond basic theory and apply project management concepts and tools to actual, real-life projects for immediate results.

You will learn to...

Carry out the essential elements of project management—defining, planning, implementing and closing out a project—to achieve the desired project outcome.

Lead and motivate a project team and communicate effectively with all stakeholders.

Identify and address issues quickly and confidently to keep projects on track.

Anticipate and reduce project risk.

Improve how future projects are delivered.

Audience: Designed for project managers or anyone in a leadership role on a project team.
