RISK MITIGATION
FOR IT

www.kepner-tregoe.com

Learn to protect your organization from unnecessary change-related incidents

"Changes create incidents"… or so the wisdom goes. The time spent "firefighting" unintended incidents resulting from a change or fix can be costly and put your organization's IT stability and reputation at risk. Conducting an up-front risk assessment ensures potential problems are handled proactively, keeping precious resources focused on progress vs. remediation. Our one-day Risk Mitigation Workshop will provide you with the skills and real-world practice in our simulation-based scenarios to manage day-to-day risks.

◈ Key Benefits

Stay productive
Keep your organization's operations up and running during fixes, maintenance and improvements by minimizing productivity loss or damage due to unexpected or unmitigated risks.

Protect your assets and reputation
Minimize financial loss and reputational exposure to your business by identifying potential issues and creating an actionable plan to prevent them or respond with agility.

Increase agility
Increase your organization's ability to respond quickly and safely when things go wrong.

Create a risk conscious culture
Embed risk mitigation practices throughout the organization that make the identification of vulnerabilities part of the business culture. Mitigation of risks should be a priority for everybody—not just for specialists.

📖 You will learn to...

Improve your risk assessment and mitigation skills through Kepner-Tregoe's practical methodology.

Understand the key questions to evaluate the level of risk you are facing and its possible impact on the business.

Learn and apply a practical approach to quickly identifying and mitigating risks then translating the insights into an actionable plan.

Acquire hands-on skill through a simulation-based, experiential learning approach that minimizes theory and maximizes practice to build true skills.

Audience: Personnel involved in daily operations such as changes, implementation of fixes, upgrades and new releases, maintenance and support, as well as project team members.

This workshop is part of an initiative for KT Experiential Learning.
