

RISK MITIGATION FOR MANUFACTURING

www.kepner-tregoe.com

Learn to protect your organization
from unplanned potential problems

Risk mitigation is often considered only after a costly and time-consuming incident disrupts operations. Performing a risk assessment before problems occur proactively handles potential problems and makes sure precious resources stay focused on progress vs. remediation. This one-day hands-on workshop will provide you with real-world practice in our simulation-based scenarios that prepare you to manage risk.

Key Benefits

Stay productive

Keep your organization's operations up and running during fixes, maintenance and improvements by minimizing productivity loss or damage due to unexpected or unmitigated risks.

Protect your assets and reputation

Minimize financial loss and reputational exposure to your business by identifying potential issues and creating an actionable plan to prevent them or respond with agility.

Increase agility

Increase your organization's ability to respond quickly and safely when things go wrong.

Create a risk conscious culture

Embed risk mitigation practices throughout the organization that make the identification of vulnerabilities part of the business culture. Mitigation of risks should be a priority for everybody—not just for specialists.

You will learn to...

Improve your risk assessment and mitigation skills through Kepner-Tregoe's practical methodology.

Understand the key questions to evaluate the level of risk you are facing and its possible impact on the business.

Learn and apply a practical approach to quickly identifying and mitigating risks then translating the insights into an actionable plan.

Acquire hands-on skill through a simulation-based, experiential learning approach that minimizes theory and maximizes practice to build true skills.

Audience: Personnel involved in shutdowns, turnarounds, and outages (STOs) and changeovers, as well as Reliability and Maintenance Engineers and project team members.

This workshop is part of an initiative for KT Experiential Learning.
